MBM ScienceBridge – your guide to innovations

Evaluation and marketing of academic inventions – that is, in short words, our competence.

MBM ScienceBridge takes up results and know-how from the scientific workday of universities and research facilities. Based on a comprehensive evaluation under economic aspects, it coordinates suitable patent applications – nationally and internationally. Subsequently innovations are presented to the professional public. MBM ScienceBridge searches for and establishes contacts with businesses from around the world and connects suitable cooperation or licensing partners. This process involves, of course, cooperation with leading patent lawyers, attorneys and other experts.

MBM ScienceBridge – your information broker

MBM ScienceBridge offers scientists comprehensive counsel around the topic of inventions and helps to evaluate these. Thus, it presents innovations from the academic world to business in a preselected and focused way.

MBM ScienceBridge – your bridge to suitable cooperation partners

MBM ScienceBridge connects academic scientists and R&D departments. It works as an intermediary for both partners while keeping marketing goals in view.

MBM ScienceBridge – your exchange for contacts

MBM ScienceBridge helps businesses to contact suitable academic work groups in scientific facilities.

Taking technology transfer seriously – our services in detail
