

Journalbeiträge

1. Brökers N, Le-Huu S, Vogel S, Hagos Y, Katschinski DM, Kleinschmidt M (2010) Increased chemoresistance induced by inhibition of HIF-prolyl-hydroxylase domain enzymes. *CANCER SCI*, 101: 129-36.
2. Farhat K, Riekenberg S, Jung G, Wiesmüller KH, Jungi TW, Ulmer AJ (2010) Identification of full length bovine TLR1 and functional characterization of lipopeptide recognition by bovine TLR2/1 heterodimer. *VET RES*, 41(3): 34.
3. Neumann J, Schaale K, Farhat K, Endermann T, Ulmer AJ, Ehlers S, Reiling N (2010) Frizzled1 is a marker of inflammatory macrophages, and its ligand Wnt3a is involved in reprogramming *Mycobacterium tuberculosis*-infected macrophages. *Faseb J (Internet-Ausgabe)*, 24(11): 4599-612.
4. Vogel S, Wottawa M, Farhat K, Zieseniss A, Schnelle M, Le-Huu S, von Ahlen M, Malz C, Camenisch G, Katschinski DM (2010) Prolyl hydroxylase domain (PHD) 2 affects cell migration and F-actin formation via RhoA/rho-associated kinase-dependent cofilin phosphorylation. *J BIOL CHEM*, 285(44): 33756-63.
5. Wottawa M, Köditz J, Katschinski DM (2010) Normoxic destabilization of ATF-4 depends on proteasomal degradation. *Acta Physiol (Internet-Ausgabe)*, 198(4): 457-63.
